The HISTORY OF MAN SUFFRAGE

It is an Error To Suppose That Men Have Always Had Universal Suffrage--They Had To Fight For It Just as Women Are Fighting For It Now.

(John Robert Vane Whistlerman)

The mistake made today is in supposing that the struggle to secure the vote for women has been a斗争 that women have always had universal suffrage. It is true that in many countries and societies, women have been granted the right to vote, but this right was not always theirs by right of birth or citizenship. In the past, women were denied the right to vote because of their gender, and this denial has been a struggle that women have fought for centuries.

In the United States, for example, the struggle for women's suffrage began in the late 19th century. The first woman to register and vote in the United States was Susan B. Anthony in New York in 1872. She was brought to court and convicted of voting illegally, but she refused to pay the fine, and her case went to the Supreme Court. The Court upheld the conviction, but the case went on to the United States Supreme Court, where it was upheld. The case was decided in favor of the state, and Anthony was fined.

The suffrage movement gained momentum in the early 20th century, with the formation of the National American Woman Suffrage Association in 1890. The movement spread across the country, and in 1913, the 19th amendment to the United States Constitution was ratified, giving women the right to vote.

In conclusion, the struggle for women's suffrage has been a long and difficult one, and it is important to remember that women's rights are not something that was granted to them by their birthright. Women have had to fight for their right to vote, just as men have had to fight for their right to vote. This is a struggle that continues to this day, as women's rights continue to be threatened and upheld.

The struggle for women's suffrage is not just a struggle for the right to vote, but a struggle for equality and freedom. Women have been denied the right to vote because they were women, but the struggle for women's suffrage is a struggle for the right to be treated as equal citizens. This is a struggle that continues to this day, and it is a struggle that we must continue to fight for.

The struggle for women's suffrage is a struggle for equality and freedom, and it is a struggle that we must continue to fight for.
